

# All Traffic Solutions

*Safety Made Simple!*

**SPEEDsentry®** is the ideal radar speed display for anywhere traffic calming is essential. Whether you need to clear complaints, increase public awareness or simply broaden your impact, you'll get better results with a **SPEEDsentry** because its unmatched simplicity and convenience mean you'll use it more often.

- Flexibility:** Mount it almost anywhere; pole, trailer or vehicle. With 12", 15" or 18" digits, there is a sign to fit your road.
- Simple to Program:** Both the wireless PDA and onboard buttons are easy to understand.
- Powerful Data:** Easily download and review the days and times you want in the speed bins you choose. Reports are practical and easy to follow.
- Multiple Power Sources:** Battery, solar assist or AC.
- Durable & Tamperproof:** Powdercoated, welded aluminum enclosure and a shatterproof Lexan shield protect the display. Plus, torx screws prevent unwanted access.

### Stealth Mode

Turn off the digits and remove the "Your Speed" sign, and this unobtrusive box will collect true, unaffected traffic patterns, before or after your traffic calming efforts.

### Violator Strobe

Grab driver attention to increase the sign's effectiveness. Whether it looks like a camera flash or simply draws attention to a motorist's speed, strobes can increase overall effectiveness by up to 30 percent.

### Wireless Management

Without leaving the vehicle or touching the sign:

- program settings
- adjust radar
- check battery
- download data

### Secure

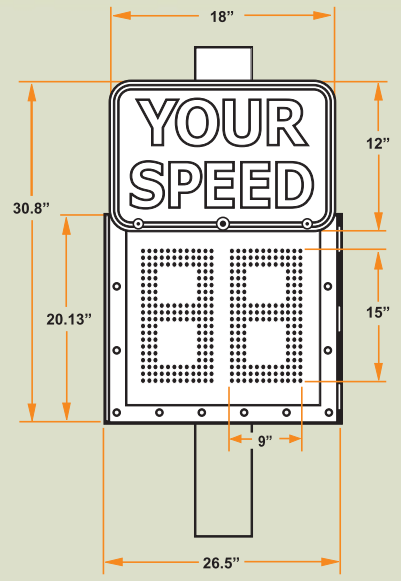

All removable features are contained within the pocket of the locked enclosure, so only the tamper-resistant end of the mounting hardware is exposed.

### High Intensity LEDs

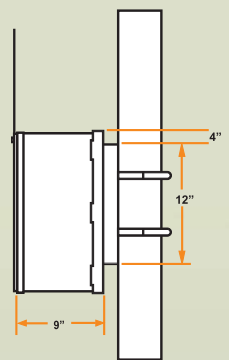

These autodimming 30° LEDs combine with glare-resistant, UV-protected Lexan to increase contrast and digit visibility.

### Shatterproof 1/4" UV Stabilized Lexan

The flexible, nearly indestructible polycarbonate absorbs energy, reducing the likelihood of damage upon impact.

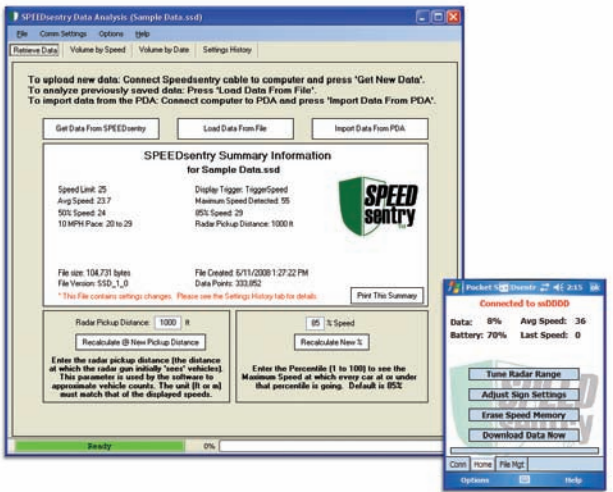

Dimensions here are for the SPEEDsentry® with 15" digits. Displays with 12" and 18" digits are also available.

**Safety Made Simple!**

## SPEEDsentry®: Software

**Powerful Data:** Easily download and review the days and times you want in the speed bins you choose.

**One Page Summary:** All key performance data within the data file is presented on one screen.

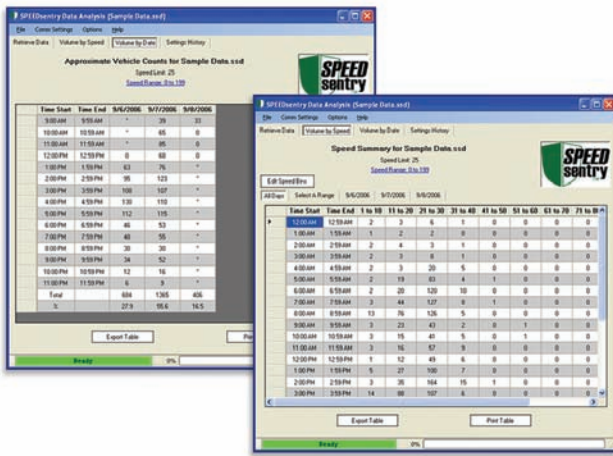

**Volume Analysis:** Identify peak travel times and trends in addition to speed.

**Easy Export:** Use Excel or any other spreadsheet program for more detailed charts and graphs to suit your needs.

**Prioritize:** See the days and times with the worst violations. Determine when and if a problem exists.

**Identify Individuals:** Isolate individual speed events to reveal a pattern, allowing very targeted enforcement.

**Review Settings:** Different settings result in different behaviors. Review the settings history to ensure reports are based on the appropriate days.

## SPEEDsentry®: Mounting & Power

**Simple Mounting:** The same display can be mounted to U-channel, square channel, any size round pole, trailer or hitch-mount using bolts or bands. The leveling swivel even lets you bolt to often less-than-vertical existing street signs.

**Internal Power Source:** The battery/AC supply is self-contained within the sign, so there is no need for an external cabinet.

**AC Supply:** From simple surge protection to isolation transformers, we can accommodate your needs.

**Solar Assist:** Available in approximately 20W, 60W or 120W capacities to fit the power needs of your configuration and location.
