

“Parts of a Bicycle” Relay Race or Timed Race Instructions

1. Create individual tags (paper, card stock) with the name of each part of the bicycle, below.
2. Punch a hole in each tag. Use a pipe cleaner, twine, or yarn to create a loop so you can hang the tag on the bicycle.
3. Place your bicycle a distance away from you in the yard or driveway.
4. Keep the tags with you.
5. You will take one tag at a time, running to the bicycle and placing the tag on the correct part of the bike.
6. Have someone start the race by saying “go”.
7. If playing with multiple people, you can have multiple bikes and sets of tags. The first person to place all of their tags correctly wins.
8. If playing as an individual, have someone time how fast you place all of the tags correctly by running back and forth from the “start” and the bicycle!
